FortiClient VPN Configuration

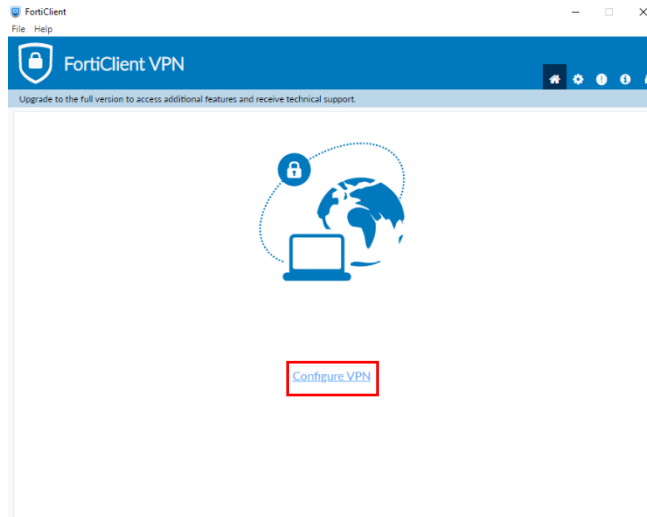

- Double-click on the FortiClient VPN with SSL Client on your desktop.

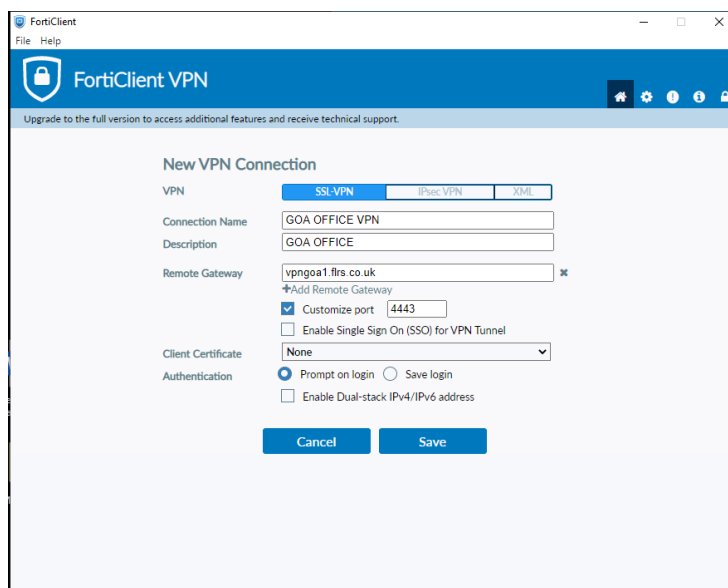

- Click **I accept**.

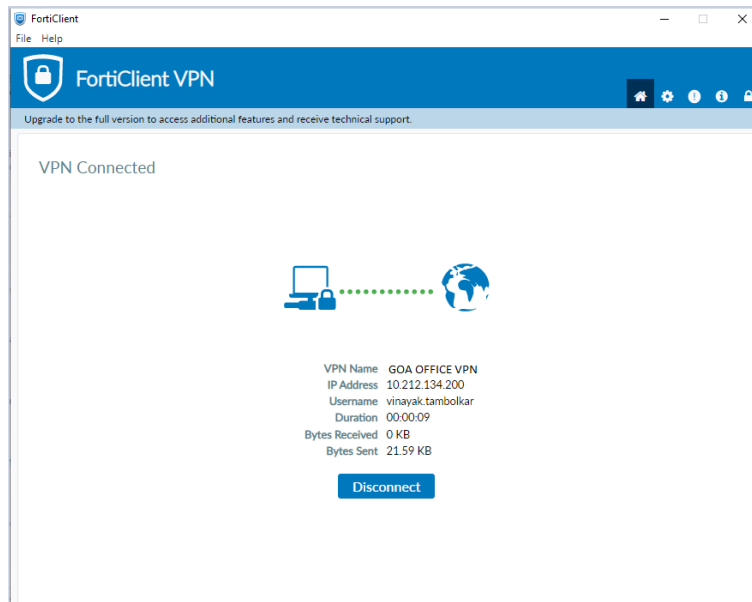

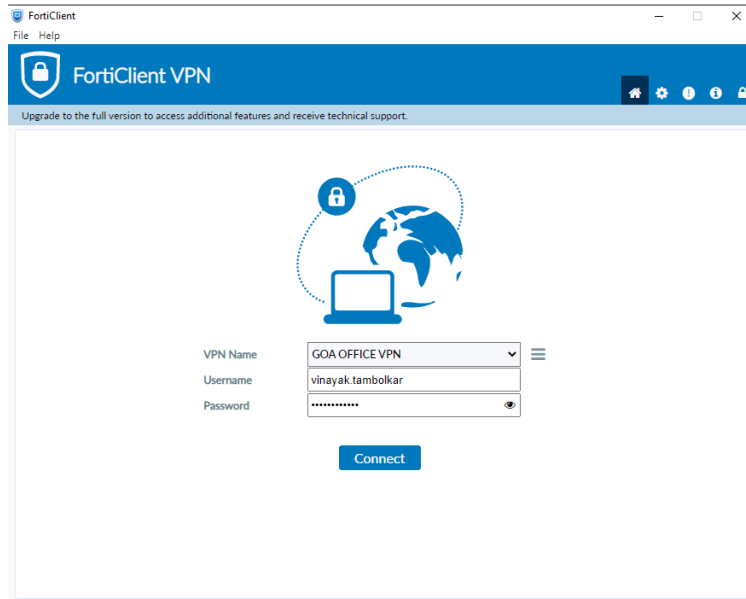

- Click on **Configure VPN** to setup new VPN connection.

- Please update the information as shown below
 - **Connection Name:** GOA OFFICE VPN
 - **Description:** GOA OFFICE
 - **Remote Gateway:** vpngoal.flrs.co.uk or vpngoal2.flrs.co.uk
 - **Check** customize port : 4443
 - Click **Save**

- Enter your **RSSPL Domain Credentials** and click connect.

- You see pop up notification that you are connected to GOA OFFICE VPN at the right bottom of the screen and the VPN connection would say as connected on the VPN Client.
